AMENDMENT FORWARD IN RESPONSE TO THE RETURN DATED 3/18/99

SUMMARY OF THE INVENTION

1. Line 3 to read as follows

with two to three sizes in one end that will eliminate a lot of frustrations of searching

2. Line 9, 10, and 11 to read as follows

biased by springs and retained (pins.) rivets. Each hexagon tool is pressured by its own individual compression spring. The hexagon tool has small (roll pin) rivet holes and slots that allows movement back and forth with the help of (roll pins) rivets restricting

DETAILED DESCRIPTION OF THE INVENTION

1. Lines 2, 9, 18, on page 3 are as follows

Figure 1. Referring to Figure 2, small (roll pin) rivet 1 fits tightly into hole 2 which hexagon tool 11. (Roll pin) Rivet 10 fits tightly into hole 9, which extends into slot 12 tool by inserting the attachment into aperture 19. As described above, (roll pin) rivet 14
